Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 28 and 30-36 are pending.

Claim rejections 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 28, 30-31 and newly added claim 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferreira et al., in view of U.S. Patent 4,269,764, and U.S. Patent 6,126,939, all of record for reasons set forth in the Office Action mailed 7-19-04.

Applicant's arguments 12-27-04 have been fully considered but are not found persuasive.

It is important to first note, that previous claim 29 was not previously rejected because it was drawn to fragments of Betv1 and as such the prior art did not read upon fragments. Since

Art Unit: 1644

newly added claim 36 encompasses full length allergens of Betv1 it has been included in the current rejection.

Applicant argues the '764 patent provides no teachings to polymerize birch pollen, nor is there any teaching on how many monomeric units there are in their polymers.

However, the '764 patent provides a general teaching that any allergen can have its allergenicity reduced by polymerization, see column 1, lines 43-50, in particular. In addition while the claim recites 2 to 10 monomers, it is not limited to 10 because the term "having" is considered open.

Applicants argue that the '939 patent provides no teaching relating to birch pollen allergen nor any teachings of combining the disclosure of the '939 patent with the '764 patent or Ferreira et al.

However, the '764 patent clearly provides motivation on why one of ordinary skill in the art would polymerize an allergen, and the '939 clearly teaches the multimerization of monomers with known alanine spacers. Once one of ordinary skill in the art would have been motivated to polymerize the birch pollen allergen taught by Ferreira, they would have been motivated to do so by known methods as taught by the '939 patent or the '764 patent, by glutaldehyde or recombinantly with an alanine spacer.

4. Claims 32-35 are free of the prior art.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
